## Problem Solving: Make a Table and Look for a Pattern

1. Find the next three numbers in each row. Write a formula to find any number in row $B$.

| $\boldsymbol{A}$ | 2 | 4 | 6 |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| $\boldsymbol{B}$ | 2 | 8 | 14 |  |  |  |

2. A company offers a $2 \%$ discount if you buy $1-5$ of their products.

If you buy 6-10 of their products, you earn a $3.5 \%$ discount.
Buying 11-15 products will earn you a $5 \%$ discount. If the pattern continues, what discount would be offered for buying 33 products?
$\qquad$
3. Explain the pattern. Draw the next eleven shapes.

$$
\bigcirc \square \bigcirc \triangle \bigcirc \square \square \bigcirc \triangle \triangle \bigcirc \square \square \square \bigcirc \triangle \triangle \triangle \bigcirc \square \square \square \square \bigcirc \triangle
$$

4. In a contest, the first place team gets $\frac{1}{2}$ of the million-dollar prize.

The second place team gets $\frac{1}{2}$ of the remaining money. Each team after that gets $\frac{1}{2}$ of the remaining money. How much will the sixth place team get?
5. An advertising sign lights up for 5 seconds then goes out for 2 seconds. For how many seconds will the sign be off in the first minute after the sign is turned on?
A 46 seconds
B 30 seconds
C 16 seconds
D 2 seconds
6. Writing to Explain Explain your thinking as you find how many triangles would be in the 8th row of the pattern
